

# Complete device, indicator light, base fixing

M22-L-G-LEDC230-BVP 168780 M22-L-G-LEDC230-BVP

# **Delivery program**

Product range		RMQ-Titan
Description		Blister pack for hanging. Complete practical solution. Can be ordered using a single article no.
Connection to SmartWire-DT		no
Equipment supplied		
1	indicator light LED element	M22-L-G M22-LEDC230-G

## **Technical data**

### General

Ambient temperature		
Open	°C	-25 - +70

10.10 Temperature rise  The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.  10.11 Short-circuit rating  Is the panel builder's responsibility. The specifications for the switchgear mus observed.  10.12 Electromagnetic compatibility  Is the panel builder's responsibility. The specifications for the switchgear mus observed.  10.13 Mechanical function  The device meets the requirements, provided the information in the instruction	10.9.3 Impulse withstand voltage			Is the panel builder's responsibility.
provide heat dissipation data for the devices.  10.11 Short-circuit rating  1s the panel builder's responsibility. The specifications for the switchgear mus observed.  1o.12 Electromagnetic compatibility  1s the panel builder's responsibility. The specifications for the switchgear mus observed.  1o.13 Mechanical function  The device meets the requirements, provided the information in the instruction	10.9.4 Testing of enclosures made of insulating material			Is the panel builder's responsibility.
observed.  10.12 Electromagnetic compatibility  Is the panel builder's responsibility. The specifications for the switchgear mus observed.  10.13 Mechanical function  The device meets the requirements, provided the information in the instruction	10.10 Temperature rise			The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
observed.  10.13 Mechanical function  The device meets the requirements, provided the information in the instruction	10.11 Short-circuit rating			Is the panel builder's responsibility. The specifications for the switch gear must be observed. $\label{eq:constraint}$
	10.12 Electromagnetic compatibility			Is the panel builder's responsibility. The specifications for the switch gear must be observed. $\label{eq:specifications}$
	10.13 Mechanical function			The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.
