# The state of the s

### Position switch, 1N/O+1N/C, narrow, IP65\_x, roller plunger

Powering Business Worldwide

 Part no.
 AT4/11-1/I/RS

 Article no.
 000498

 Catalog No.
 AT4-11-1-I-RS

### **Delivery program**

| Delivery program  |    |  |
|---|----|--|
| Basic function  |    | Position switches<br>Safety position switches              |
| Part group reference  |    | AT4  |
| Product range   |    | Roller plunger   |
| Degree of Protection  |    | IP65   |
| Features  |    | Complete unit  |
| Ambient temperature   | °C | -25 - +70  |
| Design  |    | EN 50041 Form C  |
| Approval  |    | totally insulated  |
| Contacts  |    |  |
| N/O = Normally open   |    | 1 N/0  |
| N/C = Normally closed   |    | 1 NC →   |
| Notes   |    | = safety function, by positive opening to IEC/EN 60947-5-1 |
| Contact sequence  |    | 0-\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\                     |
| Contact travel = Contact closed = Contact open  |    | 13-14<br>21-22<br>0 2.4 3.3 5.7 mm<br>Zw = 3.6 mm          |
| Positive opening (ZW)   |    | yes  |
| Colour  |    |  |
| Enclosure covers  |    | Grey   |
| Enclosure covers  |    |  |
| Housing   |    | Insulated material   |
| Connection type   |    | Screw terminal   |
| <b>Notes</b> The operating head can be rotated at $90^\circ$ intervals to adapt to the specified For degree of protection IP65, use V-M20 (206910) cable glands with connecting the |    | h.   |

### **Technical data**

### General

|    | IEC/EN 60947   |
|----|--|
|    | Damp heat, constant, to IEC 60068-2-78; damp heat, cyclical, to IEC 60068-2-30 |
| °C | -25 - +70  |
|    | As required  |
|    | IP65   |
|    | °C   |

| Terminal capacities  |                | $\mathrm{mm}^2$   |  |

|  |                |                   |  |

# Design verification as per IEC/EN 61439

| Technical data for design verification  |                   |    |  |
|---|-------------------|----|--|
| Rated operational current for specified heat dissipation  | In                | Α  | 6  |
| Heat dissipation per pole, current-dependent  | P <sub>vid</sub>  | W  | 0.1  |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>  | W  | 0  |
| Static heat dissipation, non-current-dependent  | P <sub>vs</sub>   | W  | 0  |
| Heat dissipation capacity   | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 70   |
| IEC/EN 61439 design verification  |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                   |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |

| 10.2.6 Mechanical impact                                 | Does not apply, since the entire switchgear needs to be evaluated.   |
|--|--|
| 10.2.7 Inscriptions                                      | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
