Technical data

General

Standards		IEC/EN 60529 EN 50262 DIN 43656 DIN 43660 EN 60439-4 for CI...X individual enclosures with combined distribution boards from Ci enclosures up to 680 A. Can thus be used for socket combinations and as component for construction site distribution boards.
Climatic proofing		Damp heat, constant, to IEC 60068-2-78 Damp heat, cyclic, to IEC 60068-2-30
Ambient temperature	°C	-40 - +80
Degree of Protection		IP65
Power loss		
Max. radiated heat dissipation with separate mounting, ambient air temperature +20 °C	W	72
Max. radiated heat dissipation in distribution board combination to VDE 0660 Part 500	W	54
Notes		When calculating the heat dissipation, the quadratic relationship of current with the rated diversity factor a must be considered. $P_V = I_2 \times R$ $P_V' = P_V \times a^2$ If no data is available concerning the load relationships of the individual circuits, the rated diversity factor is selected conform to VDE 0660 Part 500.
