

### Over current switch, 16A, 1p, B-Char, AC

Part no. FAZT-B16/1 Article no. 240795 Catalog No. FAZT-B16/1

**Delivery program** 

| Basic function                                  |    |    | Miniature circuit breakers                                     |
|---|----|----|--|
| Number of poles                                 |    |    | 1 pole   |
| Tripping characteristic                         |    |    | В  |
| Application                                     |    |    | Switchgear for industrial and advanced commercial applications |
| Rated current                                   | In | Α  | 16   |
| Rated switching capacity acc. to IEC/EN 60947-2 |    | kA | 25   |
| Product range                                   |    |    | FAZ-T  |

IEC/EN 60947-2

#### **Technical data**

#### **Electrical** Standards

Tightening torque

Mounting position

Thickness of busbar material

| Rated voltage                |            | V               | 240/415   |
|------------------------------|------------|-----------------|---|
| Rated frequency              | f          | Hz              | 50/60   |
| Rated switching capacity     |            | kA              | 25  |
| Characteristic               |            |                 | B, C, D   |
| Lifespan                     | Operations |                 | 20000   |
| Direction of incoming supply |            |                 | as required   |
| Mechanical                   |            |                 |   |
| Standard front dimension     |            | mm              | 45  |
| Enclosure height             |            | mm              | 80  |
| Mounting width per pole      |            | mm              | 17.5  |
| Mounting                     |            |                 | Quick attachment with 3 latch positions for top-hat rail IEC/EN 60715 |
| Degree of Protection         |            |                 | IP20  |
| Terminals top and bottom     |            |                 | Twin-purpose terminals  |
| Terminal protection          |            |                 | Finger- and back-of-hand proof according to BGV A3 and ÖVE-EN 6       |
| Terminal capacities          |            | mm <sup>2</sup> | 1 - 25  |

Nm

As required

Design verification as per IEC/EN 61439

| Technical data for design verification                                     |                   |    |   |
|--|-------------------|----|---|
| Rated operational current for specified heat dissipation                   | In                | Α  | 16  |
| Heat dissipation per pole, current-dependent                               | P <sub>vid</sub>  | W  | 0   |
| Equipment heat dissipation, current-dependent                              | P <sub>vid</sub>  | W  | 2.2   |
| Static heat dissipation, non-current-dependent                             | $P_{vs}$          | W  | 0   |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0   |
| Operating ambient temperature min.   |                   | °C | -40   |
| Operating ambient temperature max.   |                   | °C | 75  |
|  |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| IEC/EN 61439 design verification   |                   |    |   |
| 10.2 Strength of materials and parts                                       |                   |    |   |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.1 Verification of thermal stability of enclosures                   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat |                   |    | Meets the product standard's requirements.                                  |

| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.   |
|--|--|
| 10.2.4 Resistance to ultra-violet (UV) radiation   | Meets the product standard's requirements.   |
| 10.2.5 Lifting   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |  |
| 10.9.2 Power-frequency electric strength   | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  | Is the panel builder's responsibility. The specifications for the switchgear must b observed.                                    |
| 10.13 Mechanical function  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
