

Switch-disconnector, 3p, 4000 A, withdrawable

Part no. Article no. Catalog No. INX40N3-40W 150084 RES8403WSW0NMNN2MNDX

## **Delivery program**

| Product range  |                 |    | Air circuit-breakers/switch-disconnectors                  |
|--|-----------------|----|--|
| Product range  |                 |    | Open switch-disconnectors                                  |
| Current Range  |                 |    | Up to 4000 A   |
| Protective function  |                 |    | without protection   |
| Installation type  |                 |    | Withdrawable   |
|  |                 |    | Cassette must be separately ordered.                       |
| Construction size  |                 |    | INX40  |
| Release system   |                 |    | without releases   |
| Standard/Approval  |                 |    | IEC  |
| Number of poles  |                 |    | 3 pole   |
| Degree of Protection                                       |                 |    | IP20, IP55 with protective cover, IP41 door sealing frame  |
|  |                 |    | optionally fittable by user with comprehensive accessories |
| Rated current = rated uninterrupted current                | $I_n = I_u$     | А  | 4000   |
| Bemessungskurzschlusseinschaltvermögen bis 440V/690V 42/42 | I <sub>cm</sub> | kA | 187  |
| Bemessungskurzzeitstromfestigkeit t = 1 s                  | I <sub>cw</sub> | kA | 85   |
| Bemessungskurzzeitstromfestigkeit t = 3 s                  | I <sub>cw</sub> | kA | 66   |

## Technical data

| General                                     |                  |      |   |
|---|------------------|------|---|
| Standards                                   |                  |      | IEC/EN 60947  |
| Ambient temperature                         |                  |      |   |
| Storage                                     | 9                | °C   | -40 - +70   |
| Ambient temperature                         |                  | °C   | -25 - +70   |
| Mounting position                           |                  |      | 30° 30° 30° 30°   |
| Utilization category                        |                  |      | В   |
| Degree of Protection                        |                  |      | IP20, IP55 with protective cover, IP41 door sealing frame |
| Direction of incoming supply                |                  |      | as required   |
| Main conducting paths                       |                  |      |   |
| Rated current = rated uninterrupted current | $I_n = I_u$      | A    | 4000  |
| Rated uninterrupted current at 50 °C        | lu               | А    | 4000  |
| Rated uninterrupted current at 60 °C        | lu               | А    | 3650  |
| Rated uninterrupted current at 70 °C        | lu               | Α    | 3500  |
| Rated impulse withstand voltage             | U <sub>imp</sub> | V AC | 12000   |
| Rated operational voltage                   | Ue               | V AC | 690   |
| Overvoltage category/pollution degree       |                  |      | 111/3   |
| Rated insulation voltage                    | Ui               | V    | 1000  |
| Switching capacity                          |                  |      |   |
| Rated short-circuit making capacity         | I <sub>cm</sub>  |      |   |
| up to 440 V 50/60 Hz                        | l <sub>cm</sub>  | kA   | 187   |
| up to 690 V 50/60 Hz                        | l <sub>cm</sub>  | kA   | 166   |
| Rated short-time withstand current 50/60 Hz |                  |      |   |
| Rated short-time withstand current (t=1s)   | l <sub>cw</sub>  | kA   | 85  |
| t = 3 s                                     | I <sub>cw</sub>  | kA   | 66  |
| Operating times                             |                  |      |   |

| Closing delay via spring release             |              | ms     | 35   |
|--|--------------|--------|--|
| Total opening delay via shunt release        |              | ms     | 22   |
|  |              |        |  |
| Total opening delay via undervoltage release |              | ms     | 37   |
| Maximum operating frequency                  |              | Ops./h |  |
| Maximum operating frequency                  | Operations/h |        | 60   |
| Heat dissipation at rated current In         |              |        |  |
| Withdrawable units (switch with cassette)    |              | W      | 880  |
| Weight                                       |              |        |  |
| Withdrawable                                 |              |        |  |
| 3-pole                                       |              | kg     | 70   |
| 4-pole                                       |              | kg     | 86   |
| Cassette                                     |              |        |  |
| 3 pole                                       |              | kg     | 27   |
| 4 pole                                       |              | kg     | 35   |
| Terminal capacities                          |              |        |  |
| Copper bar                                   |              |        |  |
| Withdrawable units                           |              |        |  |
| Black  |              | mm     | 4 x 100 x 10   |
|  |              |        | These are values used in separate switchgear. The actual values will depend on<br>the temperature around the circuit-breaker, which is influenced by the ambient<br>temperature, the degree of protection (IP), the mounting height, the partitions, and<br>any external ventilation. Depending on the specific switchgear design, this may<br>result in derating, which can then be compensated for by increasing the cross-<br>sectional area. Temperature rise tests in the specific switchgear can provide<br>specific and detailed information. |

## Design verification as per IEC/EN 61439

| Technical data for design verification   |                  |    |  |
|--|------------------|----|--|
| Rated operational current for specified heat dissipation   | In               | А  | 4000   |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub> | W  | 880  |
| Operating ambient temperature min.   |                  | °C | -25  |
| Operating ambient temperature max.   |                  | °C | 70   |
| IEC/EN 61439 design verification   |                  |    |  |
| 10.2 Strength of materials and parts   |                  |    |  |
| 10.2.2 Corrosion resistance  |                  |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures   |                  |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                  |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                  |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                  |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  |                  |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   |                  |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |                  |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  |                  |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   |                  |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |                  |    |  |
| 10.9.2 Power-frequency electric strength   |                  |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   |                  |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   |                  |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   |                  |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   |                  |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  |                  |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
|  |                  |    |  |

The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

## **Technical data ETIM 6.0**

| Low-voltage industrial components (EG000017) / Switch disconnector (EC000216) |                       |   |
|---|-----------------------|---|
|   | h technology / Off-la | load switch, circuit breaker, control switch / Switch disconnector (ecl@ss&1-27-37-14 |
| [AKF060010])  |                       |   |
| Version as main switch  |                       | Yes   |
| Version as maintenance-/service switch  |                       | No  |
| Version as safety switch  |                       | No  |
| Version as emergency stop installation  |                       | No  |
| Version as reversing switch   |                       | No  |
| Max. rated operation voltage Ue AC  | V                     | 690   |
| Rated operating voltage   | V                     | 690 - 690   |
| Rated permanent current lu  | А                     | 4000  |
| Rated permanent current at AC-21, 400 V                                       | А                     | 0   |
