

Circuit-breaker, 3p, 2500 A, fixed

Part no. Article no. Catalog No. IZMX40B3-U25F 149682 RES6253BM2NNMNN2MN1X

## **Delivery program**

Product range			Air circuit-breakers/switch-disconnectors
Product range			Open circuit-breakers
Current Range			Up to 4000 A
Protective function			Universal protection
Installation type			Fixed
Construction size			IZMX40
Release system			Electronic release
Standard/Approval			IEC
Number of poles			3 pole
Degree of Protection			IP20, IP55 with protective cover, IP41 door sealing frame
			suitable for zone selectivity suitable for communication integrated system monitor and 4-character display optionally fittable by user with comprehensive accessories
Rated current = rated uninterrupted current	$I_n = I_u$	А	2500
Bemessungsgrenzkurzschlussausschaltvermögen bis 440V/690V 42/42	I <sub>cu</sub>	kA	66
Bemessungsbetriebskurzschlussausschaltvermögen bis 440V/690V 42/42	I <sub>cs</sub>	kA	66
Overload release, min.	l <sub>r</sub>	А	1250
Overload release, max.	l <sub>r</sub>	А	2500
Non-delayed	l <sub>i</sub> = l <sub>n</sub> x		2 - 12, OFF
Delayed	$I_{sd} = I_r x \dots$		2 - 10
Notes			
Main terminals not included, need to be ordered separately.			

## **Technical data**

Standards   IEC/EN 60947     Ambient temperature   25 + 70 (device with LCD-display -20 + 70)     Operating (open)   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Mounting position   -25 + 70 (device with LCD-display -20 + 70)     Utilization category   -25 + 70 (device with LCD-display -20 + 70)     Degree of Protection   -25 + 70 (device	General

Operating times			
Closing delay via spring release		ms	35
Total opening delay via shunt release		ms	22
Total opening delay via undervoltage release		ms	37
Total opening delay on non-delayed short-circuit release (up to complete arc quenching)		ms	45
Maximum operating frequency	Operations/h		60
Heat dissipation at rated current In			
Fixed mounting		W	345
Weight			
Fixed mounting			
3-pole		kg	43
4-pole		kg	56
Terminal capacities Copper bar			
Fixed mounting			
Black		mm	2 x 80 x 10
			These are values used in separate switchgear. The actual values will depend on the temperature around the circuit-breaker, which is influenced by the ambient temperature, the degree of protection (IP), the mounting height, the partitions, and any external ventilation. Depending on the specific switchgear design, this may result in derating, which can then be compensated for by increasing the cross- sectional area. Temperature rise tests in the specific switchgear can provide specific and detailed information.
			Permissible continuous current for circuit-breakers operating in switchboards at various internal ambient temperatures. The switchboard's internal ambient temperature should be estimated using the calculation methods of IEC regulation.

## Design verification as per IEC/EN 61439

Technical data for design verification			
Rated operational current for specified heat dissipation	In	А	2500
Equipment heat dissipation, current-dependent	P <sub>vid</sub>	W	345
Operating ambient temperature min.		°C	-25

Operating ambient temperature max.	°C	70
IEC/EN 61439 design verification		
10.2 Strength of materials and parts		
10.2.2 Corrosion resistance		Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures		Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat		Meets the product standard's requirements.
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects		Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation		Meets the product standard's requirements.
10.2.5 Lifting		Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact		Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions		Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES		Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances		Meets the product standard's requirements.
10.5 Protection against electric shock		Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components		Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections		Is the panel builder's responsibility.
10.8 Connections for external conductors		Is the panel builder's responsibility.
10.9 Insulation properties		
10.9.2 Power-frequency electric strength		Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage		Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material		Is the panel builder's responsibility.
10.10 Temperature rise		The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating		Is the panel builder's responsibility. The specifications for the switchgear must b observed.
10.12 Electromagnetic compatibility		Is the panel builder's responsibility. The specifications for the switchgear must b observed.
10.13 Mechanical function		The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

## **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation prot. (EC000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss8.1-27-37-04-09 [AJZ716010])

protection (eci@ss8.1-27-37-04-09 [AJZ/10010])		
Rated permanent current lu	А	2500
Rated voltage	V	690 - 690
Rated short-circuit breaking capacity Icu at 400 V, 50 Hz	kA	66
Overload release current setting	А	1250 - 2500
Adjustment range short-term delayed short-circuit release	А	5000 - 25000
Adjustment range undelayed short-circuit release	А	5000 - 30000
Integrated earth fault protection		No
Type of electrical connection of main circuit		Rail connection
Device construction		Built-in device fixed built-in technique
Suitable for DIN rail (top hat rail) mounting		No
DIN rail (top hat rail) mounting optional		No
Number of auxiliary contacts as normally closed contact		0
Number of auxiliary contacts as normally open contact		0
Number of auxiliary contacts as change-over contact		2
Switched-off indicator available		Yes
With under voltage release		No
Number of poles		3
Position of connection for main current circuit		Back side
Type of control element		Push button
Complete device with protection unit		Yes
Motor drive integrated		No
Motor drive optional		Yes
Degree of protection (IP)		IP20
