The specifications for the switchgear must be observed.         10.12 Electromagnetic compatibility       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.13 Mechanical function       It device meets the requirements, provided the information in the instruction	10.6 Incorporation of switching devices and components	C	Does not apply, since the entire switchgear needs to be evaluated.
10.8 Connections for external conductors       Is the panel builder's responsibility.         10.9 Insulation properties       Is the panel builder's responsibility.         10.9.2 Power-frequency electric strength       Is the panel builder's responsibility.         10.9.3 Inpulse withstand voltage       Is the panel builder's responsibility.         10.9.4 Testing of enclosures made of insulating material       Is the panel builder's responsibility.         10.10 Temperature rise       Is the panel builder's responsibility.         10.11 Short-circuit rating       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.12 Electromagnetic compatibility       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.13 Mechanical function       The device meets the requirements, provided the information in the instruction reading in	10.7 Internal electrical circuits and connections	l	Is the panel builder's responsibility.
10.9 Insulation propertiesImage: Content of the panel builder's responsibility.10.9.2 Power-frequency electric strengthImage: Content of the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialImage: Content of the panel builder's responsibility.10.10 Temperature riseIs the panel builder is responsibility.10.11 Short-circuit ratingImage: Content of the devices.10.12 Electromagnetic compatibilityImage: Content of the switchgear must be observed.10.13 Mechanical functionImage: Content of the device meets the requirements, provided the information in the instruction leaflet (IL) is observed.	10.8 Connections for external conductors	l	Is the panel builder's responsibility.
10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.10 Temperature riseIs the panel builder's responsibility.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionImage: Step Step Step Step Step Step Step Step	10.9 Insulation properties		
10.9.3 Inpulse withstand voltage       Is the panel builder's responsibility.         10.9.4 Testing of enclosures made of insulating material       Is the panel builder's responsibility.         10.10 Temperature rise       Is the panel builder's responsibility.         10.11 Short-circuit rating       Is the panel builder's responsibility.         10.12 Electromagnetic compatibility       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.13 Mechanical function       It device meets the requirements, provided the information in the instruction leaflet (IL) is observed.	10.9.2 Power-frequency electric strength	l	Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility. The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionImage: the device meets the requirements, provide the information in the instruction leaflet (IL) is observed.	10.9.3 Impulse withstand voltage	l	Is the panel builder's responsibility.
10.10 Temperature riseThe panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provide the information in the instruction leaflet (IL) is observed.	10.9.4 Testing of enclosures made of insulating material	l:	Is the panel builder's responsibility.
10.11 Short-circuit rating       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.12 Electromagnetic compatibility       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.13 Mechanical function       The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.	10.10 Temperature rise	T p	The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.12 Electromagnetic compatibility       Is the panel builder's responsibility. The specifications for the switchgear must be observed.         10.13 Mechanical function       The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.	10.11 Short-circuit rating	l: o	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function       The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.	10.12 Electromagnetic compatibility	l: o	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
	10.13 Mechanical function	T	The device meets the requirements, provided the information in the instruction eaflet (IL) is observed.

#### **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Mechanic interlock for switch (EC001044)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Component for low-voltage switching technology / Mechanic interlock for switch (ecl@ss8.1-27-37-13-03 [AKN341010])		
Auxiliary contacts, extendable	No	
Number of contacts as normally closed contact	0	
Number of contacts as normally open contact	0	

## **Approvals**

Product Standards	UL489; CSA-C22.2 No. 5-09; IEC60947, CE marking
UL File No.	E140305
UL Category Control No.	DIHS
CSA File No.	022086
CSA Class No.	1437-01
North America Certification	UL listed, CSA certified

### **Dimensions**

NZM3-XMV + NZM3-XTVD(V)(R)

NZM3-XMV + NZM3-XTVD(V)(R)0
