## Design verification as per IEC/EN 61439

|  |                  |    |  |
|--|------------------|----|--|
| Technical data for design verification   |                  |    |  |
| Rated operational current for specified heat dissipation   | I <sub>n</sub>   | A  | 200  |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub> | W  | 48   |
| Operating ambient temperature min.   |                  | °C | -25  |
| Operating ambient temperature max.   |                  | °C | 70   |
| IEC/EN 61439 design verification   |                  |    |  |
| 10.2 Strength of materials and parts   |                  |    |  |
| 10.2.2 Corrosion resistance  |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures   |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                  |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                  |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                  |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting   |                  |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.6 Mechanical impact   |                  |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.7 Inscriptions  |                  |    | Meets the product standard's requirements.                         |
| 10.3 Degree of protection of ASSEMBLIES  |                  |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.4 Clearances and creepage distances   |                  |    | Meets the product standard's requirements.                         |

|  |  |  |
|--|--|--|
| 10.5 Protection against electric shock                   |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        |  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 |  | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |  |
| 10.9.2 Power-frequency electric strength                 |  | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         |  | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material |  | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   |  | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                |  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## Technical data ETIM 6.0

|  |    |  |  |
|--|----|--|--|
| Low-voltage industrial components (EG000017) / Motor protection circuit-breaker (EC000074)   |    |  |  |
| Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Motor protection circuit-breaker (ecl@ss8.1-27-37-04-01 [AGZ529013]) |    |  |  |
| Overload release current setting   | A  |  | 160 - 200                                |
| Adjustment range undelayed short-circuit release   | A  |  | 1600 - 2800                              |
| Thermal protection   |    |  | No                                       |
| Phase failure sensitive  |    |  | No                                       |
| Switch off technique   |    |  | Thermomagnetic                           |
| Rated operating voltage  | V  |  | 690 - 690                                |
| Rated permanent current I <sub>u</sub>   | A  |  | 200                                      |
| Rated operation power at AC-3, 230 V   | kW |  | 55                                       |
| Rated operation power at AC-3, 400 V   | kW |  | 110                                      |
| Type of electrical connection of main circuit  |    |  | Screw connection                         |
| Type of control element  |    |  | Rocker lever                             |
| Device construction  |    |  | Built-in device fixed built-in technique |
| With integrated auxiliary switch   |    |  | No                                       |
| With integrated under voltage release  |    |  | No                                       |
| Number of poles  |    |  | 3  |
| Rated short-circuit breaking capacity I <sub>cu</sub> at 400 V, AC   | kA |  | 150                                      |
| Degree of protection (IP)  |    |  | IP20                                     |
| Height   | mm |  | 184                                      |
| Width  | mm |  | 105                                      |
| Depth  | mm |  | 149                                      |

# Characteristics

## Dimensions

- ① Blow out area, minimum clearance to adjacent parts
- ② Minimum clearance to adjacent parts
