Signal light, 24 V DC, IALA white, optimum, emission angle (vertical/Horizontal): 10.5 °/4.5 °, diameter: 174 mm, degree of protection: IP65/IP67, Communication interface, safe diagnostics

Product description

The signal light is designed for use in light signal systems (e.g., lock systems, movable bridges on inland waterways, etc.). The use of safety-related autonomous monitoring functions ensures high availability. Only components that conform to the industry standard are used for the monitoring functions. The signal light is available in various standardized light colors. The communication interface provides you with a large amount of diagnostic and status information. Due to safe 2-channel diagnostics, light signal systems up to performance level e and SIL 3 can be implemented.

Your advantages

- Developed in accordance with EN 12966-1, IALA recommendation E200-1
- Safe 2-channel diagnostics in conjunction with safety modules up to Cat. 4/PL e in accordance with EN ISO 13849-1, SIL 3 in accordance with EN 62061 and IEC 61508
- Fieldbus communication (possible distance from controller: 400 m)
- Fixed state in the event of interrupted communication
- High light and color intensity
- Can be dimmed in 256 steps
- Particularly economical thanks to energy-efficient LED technology and an LED service life of at least 50 000 h
