Remote network portal software. Allows remote control/viewing from one remote client PC.

## Product description

Portico is a remote control software product to view and fully interact with the desktop of another electronic device over a network. The product employs a client/server architecture that provides the ability to either establish point-to-point communication between a single device and single client, or to serve up the desktop of a single device to many clients. A control arbitration scheme ensures that only a single client has control of a device at any given time. In a manufacturing environment, Portico can be used to provide visibility and control to a machine or process from a remote location within the plant. Portico can also be used by an OEM to remotely troubleshoot a customer machine or process over the internet.

## Technical data

### Product properties

|              |                         |
|--------------|-------------------------|
| Product type | Remote control software |
|--------------|-------------------------|

### System properties

|                               |                        |
|-------------------------------|------------------------|
| Intended use for the software | Remote desktop control |
|-------------------------------|------------------------|

### License information

|                 |            |
|-----------------|------------|
| Type of license | Activation |
|-----------------|------------|

### Functionality

|                 |                         |
|-----------------|-------------------------|
| Basic functions | Remote control software |
|-----------------|-------------------------|

### System requirements

|                     |   |
|---------------------|---|
| Operating system    | Windows® 7                                |
|                     | Windows® 10                               |
| Processor           | Atom™ or above                            |
| Hard disk memory    | ≥ 100 Mbyte (minimum (client and server)) |
| RAM                 | ≥ 512 Mbyte (minimum)                     |
| Interfaces          | ≥100 Mbps Ethernet LAN                    |
| Languages supported | German, English, French, Spanish, Italian |
