Multilingual software for terminal strip configuration. A marking module enables the professional marking of markers and labels for identifying terminal blocks, conductors and cables, and devices.

Your advantages

☑ Quick, easy, and flexible adaptation to changing requirements

☑ The labeling is clearly assigned in the project structure

☑ The professional version also includes an efficient template designer, which can be used to design custom labels and adapt existing material descriptions

☑ Graphics, various barcode types, and geometric elements such as squares, circles, and lines can be accessed for design work

☑ Data can also be imported into the templates from various data sources

☑ Labeling is produced in the sub-projects
