WAGO Kontakttechnik GmbH & Co. KG Hansastr. 27 32423 Minden Phone: +49571 887-0 | Fax: +49571 887-169 Email: info.de@wago.com | Web: www.wago.com Do you have any questions about our products? We are always happy to take your call at +49 (571) 887-44222.

The push-in type jumper bar system is based

on the common plug and socket principle. Each terminal block is spring-loaded with a double socket and a resilient CrNi steel

spring. The jumper contact material is pure

extremely small design capable of carrying the full-rated current of the terminal block. Ground terminal blocks can also be commoned using the same jumper system.

Custom jumpers are created by breaking

and removing jumper contacts (2000, 2001,

electrolytic copper, which allows for an

Removing a push-in type jumper bar.

Insert the operating tool between the jumper and and partition wall of the dual jumper slots, then lift up the jumper.

Place the operating tool in the center of jumpers up to five contacts (see above), or alternately on both sides for jumpers with more than five contacts.

#### Jumpered

2002, 2004 Series).

Custom push-in type jumper bars are created by breaking off jumper contacts.

Marking a push-in type jumper bar using a felt-tip pen.

#### Jumpered

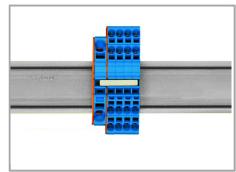

An application example: colored push-in type jumper bars are used with sensor terminal blocks.

#### Jumpered

Stepping down via push-in type jumper bar.

Stepping down via push-in type jumper bar.

Commoning via closed terminal side with end plate allows jumpering over two crosssection sizes, e.g., from 16 mm<sup>2</sup> (6 AWG) to 6 mm<sup>2</sup> (10 AWG) or from 6 mm<sup>2</sup> (10 AWG) to 2.5 mm<sup>2</sup> (14 AWG) (see illustration above).

Stepping down via push-in type jumper bar.

Commoning via open terminal side with end plate allows jumpering over two crosssection sizes for 16 mm<sup>2</sup> (6 AWG) and 10 mm<sup>2</sup> (8 AWG) and one cross-section size for 6/4/2.5 mm<sup>2</sup> (10/12/14 AWG). An example: from 16 mm<sup>2</sup> (6 AWG) to 6 mm<sup>2</sup> (10 AWG) (see illustration above) or from 10 mm<sup>2</sup> (8 AWG) to 4 mm<sup>2</sup> (12 AWG).

WAGO

Note:

The total current of the outgoing circuits shall not exceed the nominal current of the step-down jumper/push-in type jumper bar.
