The continuous shrink sleeves of the MultiMark series are printed in seconds using our thermo-transfer printers. The length of the marker can be individually adjusted to suit the number of characters or available space. The required length is pre-perforated precisely using a special blade. With their oval shape the markers can be opened easily, applied quickly and shrunk precisely to fit the conductor. An external reel holder (1302920000) has to be used for reels above 30 m printing material.
