Process reliability: TM-I

TM-I inlay tags have a guide tab which allows them to slide easily into the transparent sleeves from the type TM. The MultiMark TM-I markers should not be used together with the CLI T sleeves. We currently optimize the usability of the transparent sleeves from the type CLI T. Once the tag is in place, the tab is snapped off at the predetermined break point. The ready-assembled sleeves can then be simply pushed over the conductors. Your benefits: large quantities can be efficiently pre-assembled in a single step.

Your benefits with MultiMark

- Compact, practice-oriented range of products
- Quickly printed and assembled
- Reliable identification of your connections
- Excellent material properties

General ordering data

Type	TM-I 30 MM RT
Order No.	2005870000
Version	TM-I, Insert markers, 30 x 4 mm, red
GTIN (EAN)	4050118390384
Qty.	2,000 pc(s).
compatible printer	2599430000 2599440000

Accessories

Ink ribbons THM MMP

These printers produce excellent printing results thanks to the thermal transfer technique. Different materials and the user-friendly printing system under Windows optimise marking efforts.

General ordering data

Type	RIBBON MM 76/360 SW	Version
Order No.	2005080000	Ink ribbon
GTIN (EAN)	4050118389951	
Qty.	1 pc(s).	

Accessories / replacement parts

Our marking systems can be used to quickly and reliably label connector markers, conductor and cable markers, device markers and labels. The M-Print® PRO software enables rapid and easy identification of your electrical equipment. You can design, label and order your marking materials professionally and quickly. Frames, barcodes, graphics or photos are easily incorporated. The versatile data conversion routines enable quick and flexible data integration. The Weidmüller PrintJet ADVANCED, MCP Plus and MCP Basic printers and the THM series printers are available for printing.
